

METIS DRS 2020 DCS PLUS

The latest release of the most famous METIS large format scanner, specifically designed for the Industrial and Decor markets. It integrates cutting-edge METIS technologies such as natural colour and appearance capturing, 3D data calculation, glossiness and more.

Specifications

METIS DRS 2020 DCS Plus

Scan Format:

Up to 200x120 cm (78.74 x 47.24in); Dimensions can be extended thanks to the proprietary Scan Merge tool which allows perfectly and automatically stitching different acquisitions.

Maximum Thickness:

(~) 15cm (5.90in) at 200x120cm (78.74 x 47.24in) format; up to 50cm (19.68in) at smaller formats.

New Camera:

Allows extension of native optical resolution.

Higher Optical Resolution:

Up to 1600 PPI (software adjustable from 100 to 3200PPI).

Image Sensor:

16K CMOS, trilinear, high dynamic range, low noise, high colour fidelity.

Image Processing:

16bit per channel (48bit) independently from selected output format.

Acquisition Modes:

Scan, SuperScan, Direct SuperScan, DOF+ (various combinations are also possible)

Auto-Focus:

Via the simple-to-use software, the lighting system and camera lens automatically adjust to the selected resolution and allow the easy compensation of originals thickness.

Patented Lighting System:

8 light sources with variable intensity; thousands of different light schematics can be obtained through dimming and light distance setting (fully automated and software controlled)

Light Source Type: High CRI LEDs, IR/UV free

METIS Software:

All software runs natively at 64bit on Windows 10 or 11 64bit Professional edition.

METIS Scan Director Software:

Drives the METIS scanners, integrating all the tools and features needed to capture the highest quality data both simply and effectively. Included within Scan Director are the METIS Light Inspector and METIS Colour Profiler software to provide a smooth and optimal workflow.

METIS Light Inspector Software:

Provides extensive features needed for the post-processing of a METIS scan, such as adjustment of the light and visual appearance, the generation of the 3D depth, glossiness, and normal MAPs, to the automatic stitching tool.

METIS Colour Profiler Software:

Automatically handles the colour accuracy of the scanner with tools for calibration, profile creation and conversion, and the validation of colour and ICC profiles. The software also fully supports ICC profiles from scan, on-screen visualisation, to the exported data.

Image Save Formats:

Metis MDC, standard TIFF (colour: 48 or 24 bit; Grayscale: 16 or 8 bit), JPEG and other formats are also available in normal scan mode.

Holding Table:

(~)250x140cm (98.43 x 55.12 in), can hold up to 200kg (440.92 lbs); integrated pressure sensors.

METIS Vacuum Table: Optional

Scanner Sizes:

(~)295cm (116.14 in) length, 243cm (95.67in) width, 238cm (93.7 in) height.

Product specification or appearance may change without prior notice.
